Information Centre, Avonbank,  
Feeder Road, Bristol, BS2 0TB.  
Call 0845 601 2989

### Your usage

The graphs summarise your recent usage. They may be based on estimates.

#### Your comparative usage

Over the last year, we have estimated you used 3,962 kWh of electricity, costing £630.27. If you use the same amount for the next 12 months, that will come to £662.14. This uses our latest prices, including your discounts and added charges, like VAT. It is for comparison purposes: your regular payments are worked out differently & take the weather into account. You're on our Standard (Variable) tariff, so if our prices change, this projection would too.

3,962 kWh of electricity	x 14.46p=	£572.91
365 days electricity standing charge	x 18.00p=	£65.70
No Mains Gas Discount		£8.00 credit
VAT @ 5% of £630.61		£31.53
<b>And all that comes to</b>		<b>£662.14</b>

## Your account with us

Here's all the important information about your energy supply and your contract with us - neatly in one place.

### Your tariff - Standard (Variable)

Variable tariff

£662  
Your annual cost if you use the same next year\*

£0  
No termination fee

Electricity from various energy sources

Thank yous

\*This is based on your electricity and/or gas for the last year. It includes your payment method and discounts, if any apply.

Supplier	Your electricity tariff	Standard (Variable)
EDF Energy	Unit rate	14.46p per kWh
Fuel type Electricity	Standing charge	18.00p per day
Payment method Cash/ Cheque Whole Amount	Tariff ends on	No end date
	Exit fees	None

## Can we thank you?

As you've chosen not to receive marketing information from us, we can't thank you for being our customer with our *Thank yous* programme. To update your account, simply visit [www.edfenergy.com/mydetails](http://www.edfenergy.com/mydetails)

## What is a kWh?

A kWh stands for kilowatt-hour - it's the unit we use to measure energy usage. A single kWh will power a 15 watt energy-saving lightbulb for almost 3 days!

## What makes up a bill?

This breakdown of our costs to supply energy is an average across residential customers on all payment types & based on the average of EDF Energy customers' consumption in 2011 (4,363 kWh of electricity and 13,861 kWh of gas per year).

### Electricity

5% VAT  
8% Social and environmental  
16% Operating  
23% Delivery  
48% Wholesale electricity  
(Correct as at 31 December 2011)

### Gas

5% VAT  
4% Social and environmental  
15% Operating  
25% Delivery  
51% Wholesale gas  
(Correct as at 31 December 2011)

**VAT:** set by government at 5% for all domestic energy charges.

**Social & environmental:** we're obligated to take part in government programmes that help vulnerable customers and reduce CO<sub>2</sub> emissions.

**Operating:** the cost of keeping our call centres open and our customers' accounts running smoothly.

**Delivery:** what we pay owners of the wires, pipes and meters that supply the energy to customers' homes.

**Wholesale:** we produce our own electricity but we also buy electricity and gas from wholesale market.

**Profit and loss:** Like most companies, we aim to make a profit. In 2011, EDF Energy made a profit (EBITDA) of £1,664m. Our residential business - supplying energy to customers' homes - made a loss of £85m.
